

Need Microscopes?

We Have Them!

MICROSCOPY. DIGITAL IMAGING. NON-CONTACT

Focus 850 Stereo Microscopes

The Focus 850 Series with a 6.3:1 zoom ratio is an ideal choice for industrial inspection, assembly, quality control, and OEM applications. The Trinocular version allows the use of both eyepieces and a camera simultaneously – great for training and documentation. Magnification range 8x-50x (with 10x eyepieces)

Carl Zeiss Stereo Microscopes

Zeiss microscopes are the standard all other microscopes are measured by. Zeiss offers an optically superior and competitively priced line of microscopes with tilting eye tubes for enhanced ergonomics.

Stereo Microscopes generate three-dimensional, laterally precise images for your microscope applications. These products offer large object fields and allow extended working distances. A Stereo Microscope from Carl Zeiss is ideal for observing large biological

HDMI Digital Imaging

The new HDMI/USB 2.0 camera is the next step in the evolution of our powerful line of digital HD cameras for microscopy.

The camera can be used as a live image HD (1080p) camera to a monitor using an HDMI cable or as a USB 2.0 camera with USB cable connected to any computer or Windows Tablet.
